

# Thoughts regarding implementation of vision regarding Sustainable Mobility

- What & How
- Do we need Public Transport / Walkable Cities?
- Are we using the proper tools to execute such a complex project ?
- Conclusion

# Do we need Public Transport / Walkable Cities in Cyprus ?

How is Nicosia going to Grow

- Education
- Culture
- Services
- Government Sector

# How do Successful cities implement Visions

High quality plans joining economic objectives , Land Use Planning, infrastructure investment

- High quality plans create stable and attractive investment products that help finance PPP

light rail in Dallas spurs vibrant development along the way

# Do we have the tools – Know & Do ?

Economic objectives (How are our cities going to grow)

Land use planning (Know What VS How)

Infrastructure (Know What VS How )

# Stakeholders Engagement

- In this respect the most influential stakeholders of the Scientific, Business, and academia of Cyprus proposed:
  - the terms of reference regarding the mandate to the Privatization of government land should encourage the exchange of views , know-how, new ideas, from stakeholders
  - the use of international best practice for the successful privatisation of government land aiming at the design of a strategic master plan that will act as a catalyst for the regeneration of the economy
  - Museum : Not as an island but a cultural experience (place making ) linked with rest of the city

Cities are engines of economic growth.

great places  
need to be  
planned

## High quality planning as catalyst for regenerating our Cities / economy

- Improve global competitiveness securing greater capital inflows
- Create more jobs / ripple effect
- Create added value and enhance debt sustainability of both private and public sector
- Economic efficiency
- Viable PPP projects

# Conclusion

- Great potential many comparative advantages
- High quality planning to unleash this great potential to improve our quality of life , regenerate our economy , and organize viable PPP
