

8 January 2013

To whom it may concern

I write this letter of recommendation regarding the services provided by Easy Conferences and its managing Director Mr. Petros Stratis with full satisfaction. We have been involved in the organization of various workshops and conferences in the last few years, as these events form an essential part of our activities. I am pleased to say that all events organized by Easy Conferences have been fulfilled with impeccable service and outstanding organization.

Our most recently organized conference (1st Conference on Power Options for the Eastern Mediterranean Region - POEM 2012) in November 2012, in Limassol, was co-organized by the Cyprus Employers and Industrialists Federation (OEB), the Electricity Authority of Cyprus (EAC), the American University of Sharjah (AUS) and was endorsed by the Cyprus Energy Regulatory Authority (CERA), the Natural Gas Public Company (DEFA), the Renewable Energy Sources (RES) and Energy Saving Special Fund, the University of Cyprus (UCY) and the Cyprus University of Technology (CUT). The Conference was attended by more than 250 participants representing the local and foreign press of the Region, the stakeholders of the political and energy field, the experts of the energy industry, engineers, economists, investors, academics, as well as oil and gas exploration stakeholders. In the Conference, the two Presidential Candidates for the 2013 Presidential Elections Candidates, Dr. George Lillikas and Dr. Stavros Malas, as well as the representative of Mr. Nicos Anastasiades, Mr. Averof Neophytou, were honorary speakers. Furthermore, Mr. Nicolas Papadopoulos, Chairman of the Financial and Budgetary Committee, addressed the Conference, whereas a keynote lecture was given by Mr. Nicos Rolandis, Former Ministry of Foreign Affairs and Former Minister of Commerce and Industry.

During POEM 2012 Easy Conferences and Mr. Stratis have once again shown their trademark dedication and high level of professionalism in managing effectively all aspects of the conference organization. This included, among others, the registration, accommodation, transportation, conference lunch and dinners, and budgetary issues. In particular, the registration and accommodation process for each Conference participant was significantly facilitated by the use of Easy Conferences efficient online registration software. The use of this tool on the one hand enabled all participants to complete the registration process within minutes, but on the other hand it gave them freedom to make as many changes and/or amendments they required. Furthermore, it enabled us to have instant access to information required for the better monitoring and organization of our event.

Based on the above excellent organisational skills and having regarded the successful implementation of POEM 2012 the 2nd Conference on Power Options for the Eastern Mediterranean Region (POEM 2013) will take place in October 2013. We have already started preparing POEM 2013 having Easy Conferences again as our main organiser, so as to maintain the high standards we have set together in conference organization and hosting.

I would like to therefore endorse the services provided by Easy Conferences, and recommend this company for a successful conference or workshop organization.

Yours faithfully,

Dr. Andreas Poullikkas
POEM 2012 Conference Chairman
