

To Whom It May Concern

We have contracted Easy Conferences for the financial management of the conference SAS 2018, the 25th International Static Analysis Symposium, which was held August 29th - 31st, 2018, in Freiburg im Breisgau, Germany.

We are extremely satisfied. Everything was perfect. The price is very reasonable, given the great service they provide. They were available, it seemed, day and night, seven days a week. I extremely obliged especially to Sotia and Boyana; they did so much. Thank you, Sotia! Thank you, Boyana!

There was no moment where I had to worry about a financial transaction, whether it was about incoming money (registration, sponsors, ...) or about paying expenses (conference venue, conference banquet, reimbursement of invited speakers, ...).

One thing which I like in particular is that they trusted me (i.e., they don't ask for money upfront) and that I know that I can trust them (for example, we agreed that they will transfer the surplus of this year's edition of SAS to the organizer of next year's edition of SAS).

I will contact Easy Conferences again when I hold a conference, and I have already suggested their name to several colleagues.

Please do not hesitate to contact me if you have further questions.
